The United Steelworkers, West Fraser Timber reach tentative deals

Moscow. Oct 18, 2010. /Lesprom Network/. The United Steelworkers (USW) has concluded a series of tentative agreements with West Fraser Timber Co. Ltd. in British Columbia's northern interior.

USW Wood Council Chair Bob Matters says full details of the tentative agreements will be provided by the local unions.

In general, terms of the four-year contract, expiring on June 30, 2013, enhance job security, improve health and welfare Benefits, stabilize the long-term-disability plan and improve contract language regarding permanent and partial closures of manufacturing operations.

In addition to a \$250 signing bonus and general wage increases in the third and fourth years, a trades rate adjustment has been negotiated. As well, a profit pay plan may provide workers additional compensation as the forest industry recovers.

USW Local 1-417 members employed at West Fraser's Chasm sawmill are covered by negotiations with the IFLRA (Interior Forest Labour Relations Association) that will resume on October 26.
